

MV RESIN INJECTED TAPE JOINTS

DESCRIPTION

The molded tape joint kit is designed to ensure electrical continuity between two cables using the technique of reconstructing all components of two single-core or three-core cables with synthetic insulation.

It is buried in the ground similar to the cables. The resin provides sealing and robust mechanical protection.

CARACTERISTICS

Reference	6/10 kV	12/20 kV	18/30 kV
Single-core molded tape joint	JUR 12	JUR1-3	JUR 36
Set of 3 single-core molded tape joints	J3UR 12	J3UR1-3	J3UR36
Three-core molded tape joint	JTR 12	JTR1-3	JTR 36
