

600V CABLE STRIPPER

WITH 4 CABLE BUSHINGS

DESCRIPTION

600V Cable Stripper by Ripley is a stripping tool specifically designed to simplify the installation and maintenance of cables in low- and medium-voltage electrical distribution networks.

This cable stripper features four interchangeable bushings, allowing for quick, precise stripping without damaging the conductor, while accommodating cables of various sizes.

SPECIFICATIONS

- **Four-Sided Design:** Enables the use of four interchangeable bushings, providing flexibility in use and simplified maintenance.
- **Bushing Compatibility:** Square-cut or beveled bushings adapt to various cable sizes and types.
- **Safety:** Protected blades prevent accidents during use.
- **Efficiency:** The quick and precise stripping system saves time during electrical installations.

Reference	Code	Dimensions (mm)	Weight (g)	Min. Cable Outer Diameter (mm)	Max. Cable Outer Diameter (mm ²)
4x4® Plus Series	400 000	114 x 127	397	4,11	380

MATERIAL

- **Body:** Lightweight and durable aluminum for easy handling and long-lasting performance.
- **Blades:** Hardened steel ensures clean cuts without damaging the conductors.
- **Bushings:** Stainless steel to prevent wear and ensure the tool's long service life.

APPLICATION

- Stripping electrical cables in secondary distribution networks at 600 V.
- Suitable for concentric, compressed, and compacted cable types.
- Designed for cables ranging from 10 mm² to 375 mm², with insulation thicknesses from 1.14 mm to 2.41 mm.
- Primarily used in the industrial sector by installers and technicians specializing in electrical networks.
