

ALUMINIUM SPICE SLEEVE

DESCRIPTION

Aluminium sleeves are devices designed to efficiently link two or more conductors to ensure electrical and mechanical continuity.

Designed to meet the requirements of low and medium voltage networks, these connectors ensure a reliable, durable, and secure connection, even in challenging environmental conditions.

SPECIFICATIONS

- Suitable for single-core and three-core cables.
- Compatible with copper or aluminum conductors.
- Compatible with various cable cross-sections.
- Ensure electrical insulation in compliance with current standards.
- Provide protection against moisture and contaminants.
- Resist mechanical stress and temperature variations.
- Guarantee enhanced durability in diverse environments.

Reference	Code	Core cross-section (mm ²)	Dimensions
