

# INSULATING PIERCING CONNECTOR

## CE-JBCF-10

### DESCRIPTION

The CE-JBCF-10 insulation piercing grounding connectors are applicable for 10kV overhead insulated conductor grounding protection and temporary electrical inspection.

### SPECIFICATIONS

- Special designed shear head bolt allows efficient installation under controlled shear torque which ensure the contact teeth properly penetrate the conductor without damaging the mechanical strength of the conductor.
- Seals and grease are applied to prevent moisture entering the cable and connector which guarantees excellent waterproof and corrosion resistant performance.
- End cap is attached to the body.
- No loose parts could fall to ground during installation.
- Standard:DL/T 1190-2012

Référence	Section principale (mm <sup>2</sup> )	Vis	Box (pcs)	Emballage (pcs)
CE- JBCF-10-25-95	25-95	1	4	16
CE- JBCF-10-95-240	95-240	2	3	12

### MATERIAL

Body is moulded from high strength and weather resistant material.  
Main line : insulated aluminium cable

### APPLICATION

Used for the branch connection and jointing of 10kV overhead insulated conductor.
