

SQUARE-CUT BUSHINGS

DESCRIPTION

Square-Cut Bushings are essential components of the cable stripping tools offered by Ripley Tools. They ensure precise positioning and a clean cut of the cable insulation, guaranteeing optimal preparation without damaging the conductor.

The bushings are typically made from durable and resistant materials, designed to meet the specifications of the cables being processed. They are specifically crafted to fit Ripley stripping tools, such as the WS 22, 4x4 Plus series, and others.

SPECIFICATIONS

- Designed for use with Ripley WS 5 Series stripping tools.
- Available in various sizes to accommodate a wide range of cable diameters.
- Made from durable materials to ensure long life and consistent performance.
- Precision: Bushings provide a square or beveled cut, preventing damage to the conductor.

MATERIAL

- Blades: Hardened steel for clean cuts without harming the conductors.
- Bushings: Stainless steel to prevent wear and ensure long tool life.

APPLICATION

Bushings are used in conjunction with Ripley stripping tools to prepare cable ends before connection or termination. They are essential for electricians and technicians working on electrical installations, ensuring precise and safe stripping.
